

ADB

ADB Switch

For X3pro glasses with OS version 25.8.13 or later, an ADB switch has been added, which can be enabled through the following steps:

- On the page as shown, go to 【Glasses Settings】 - 【General】 , swipe to the far left and trigger the "wall collision" effect 10 times to enable/disable ADB mode.

- [📄 Solution to the Problem of X3Pro adb Not Being Recognized](#)

For the Rayneo X2, you need to enable the ADB installation command before installing an APK. The command is as follows: adb shell settings put global mercury_install_allowed 1

ADB Command Reference for AR Glasses
